

# Assisi<sup>®</sup> Animal Health

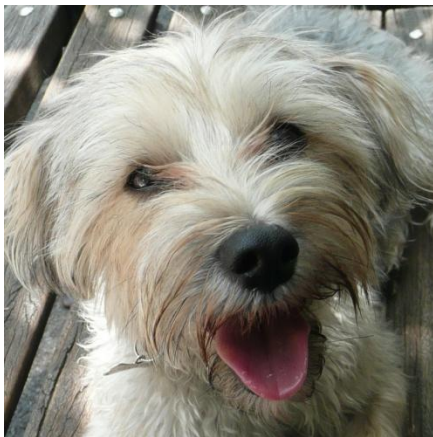

## Assisi Portable™

The disposable battery-operated tPEMF **FDA-cleared** device weighs about two ounces and is available with a single 7.5 inch therapy applicator. The device is non-invasive and can be conveniently incorporated into bandaging or casting allowing maximum freedom of movement for the animal. The Portable—90 can be used manually or in a programmed mode, as recommended by an animal healthcare professional. When used manually you get 90 15 minute treatments.

### Features

- Portable battery-operated devices – *send them home with clients to continue treatments*
- Virtually labor free - *easy for clients to administer*
- Compatible with other adjunctive therapies – *use laser in the office and tPEMF at home*
- **No known side-effects**
- **Non-drug, non-invasive**

**For more information:**

*“I have been very impressed with this new technology.*

*In the process of gathering data on over 50 cases (dogs and cats and people) I have seen...approximately a **90% effectiveness in decreasing pain and improving movement.***

*In some **neurological** cases it has been literally “unbelievable” on the significant improvement the patients have made after use of the loop...”*
